

NGUYEN THANH PHONG

.NET DEVELOPER INTERN

(+84)34 565 1206
 phongg.dev@gmail.com

Thu Duc City, Ho Chi Minh City
 21/07/2003

SUMMARY

I'm a proactive intern with practical experience in .NET development, focusing on ASP.NET Core, C#, and SQL Server. I've built RESTful APIs, integrated secure payment systems, and applied SOLID principles in various projects. I'm enthusiastic about learning, and growing professionally as a .NET Developer Intern.

EDUCATION

10/2021 - 01/2025

MAJOR - INFORMATION TECHNOLOGY

- Ho Chi Minh City University of Technology (**HUTECH**)
- GPA: 3.54 / 4.0**

WORK SKILLS

- Programming Languages:** C, C#, Java, Javascript, Python.
- Database System:** SQL Server, MySQL, MongoDB, SQLite.
- Framework:** ASP.NET Core, Express.js, Spring Boot, Django, Flask, ReactJS, Bootstrap.
- Soft Skills:** SOLID Teamwork Skills, Problem-Solving Skills, Git Version Control, Agile Scrum Project Management.

WORK EXPERIENCE

06/2025 - 08/2025 • Cloud Engineer Intern (AWS)

I worked as a system builder, integrating backend services with AWS tools to enhance the product experience and resolve project issues.

CERTIFICATIONS

- Agile & Scrum Training** Issued on June 25, 2022 by DEK Technologies Vietnam
- English Certificate – CEFR Level B1** Issued on by HUTECH University

PROJECTS

MANGASMURF - COMIC READING PLATFORM

08/2024 - 12/2024

Team Leader & Main Coder - Team of 3 Members

Our project utilizes modern technologies to deliver an optimized manga-reading experience, recognized for its creative approach, user-friendly design, and practical features.

Tech Stack: ASP.NET Core, JQUERY, Ajax, Bootstrap, Python(FlaskAPI).

Responsibilities:

- Developed authentication modules using ASP.NET Identity with Google and Facebook OAuth.
- Implemented RBAC-based authorization for secure and scalable role-permission management.
- Integrated VNPay for secure online transaction handling using .NET SDK.
- Set up email notification services for user activities including invoices, and password recovery.
- Implemented a recommendation system using Python and similarity-based models.

Room Rental Finder Web - TIMTRO24H

1/2025 - 04/2025

Team Leader & Main Coder - Team of 3 Members

Our project helps users efficiently search for rental rooms that match their personal criteria. It focuses on speed, accuracy, and a user-friendly experience tailored for students and young professionals.

Tech Stack: Node.js, MongoDB, ReactJS, Google Maps API.

Responsibilities:

- Built RESTful APIs with Node.js to handle authentication, room listings, and user interactions.
- Integrated Google Maps API to display and pinpoint rental locations.
- Implemented email service via SMTP for feedback collection and password recovery.
- Wrote E2E automated tests using Cypress to validate key user flows and ensure application stability.
